Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

GDNF; rat; kidney disease; glomerulonephritis; therapy; ds. mat_peptide sig_peptide Location/Qualiflers 117..1523 /*tag* a 117..188 /*tag* b 189..1520 /*tag* c

```
cc relates to novel uses of GDNF and its receptor. In particular, it cc relates to native rat GDNFF alpha (see W27327), its variants and cc soluble derivatives (extracellular domain), chimeric GDNFF alpha (cc and antibodies which bind to the GDNFF alpha, including agonist cc and neutralising antibodies, as well as various uses for these cc molecules. It also relates to assay systems for detecting ligands ct to GDNFF alpha, systems for studying the physiological role of cc GDNFF diagnostic techniques for identifying GDNF-related conditions, cc methods for identifying molecules homologous to GDNFF alpha, and cc therapeutic techniques (claimed) for the treatment of GDNF-related conditions, particularly kidney disease cassociated with glomerulonephritis and enteric nervous system cc claimed disorders. Transgenic and knockout animals are allowed.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             uery Match 88.2%;
